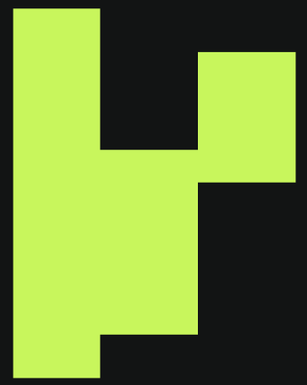
FOR PEOPLE WHO SHIP

Built in public. Launched with proof.

The builder launchpad. Connect a real GitHub identity, link visible source, and launch from your own wallet.

BUILDORS / MARK



32 x 36 / original vector

GITHUB IDENTITY

SOURCE SNAPSHOT

WALLET APPROVAL

QUIET BY DESIGN. SPECIFIC BY DEFAULT.

Builder-first. Evidence-led.

Buildors makes source evidence visible at the moment a project becomes a token.

THE BRAND PROMISE

Real identities.
Visible repositories.
Recorded source.

A calm place to inspect what a builder has published before choosing what to do next.

CLEAR

Connect GitHub to verify your identity.

SPECIFIC

Source inspected at this commit.

CALM

Confirmation is pending. Check again.

HONEST

Repository evidence is not a code audit.

01 Show the evidence

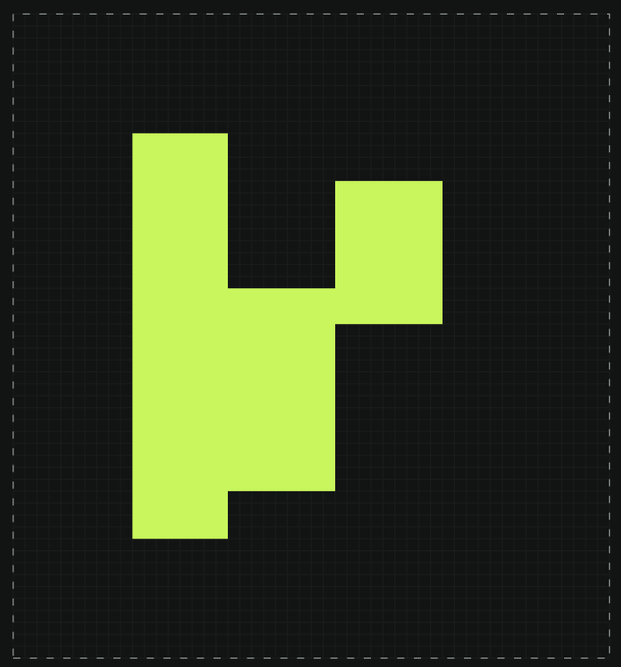
02 Name the next action

03 Explain uncertainty

A pixel mark that belongs to builders.

Keep the original geometry. Pair the mark with a quiet wordmark and generous clear space.

MARK GEOMETRY



Clear space: at least 1/4 mark height.

buildors.

PRIMARY LOCKUP

buildors.

REVERSE ON LIGHT

USE WITH CARE

Minimum mark height: 24 px.

Use flat color and sharp corners.

Do not stretch, round, outline, or add effects.

A quiet canvas. One signal color.

Use layered neutrals for hierarchy. Save acid lime for the mark, verified evidence, and focus.

CANVAS

#090A0A

SURFACE

#121414

RAISED

#191C1B

ACID LIME

#C8F65C

Signal, not a background theme.

BORDER

#282D2A

TEXT

#F4F5F2

MUTED

#929A95

READABLE BY DEFAULT

18.1:1

Text on canvas

6.9:1 muted on canvas

Primary actions stay white. Lime confirms evidence and keyboard focus; it never promises returns.

Human rhythm. Technical precision.

DM Sans carries the product. IBM Plex Mono labels the evidence without turning every screen into code.

DM SANS / 450 + 500

Aa

Ship something real.

A clear heading, a useful sentence,
and enough room to read both.

Sentence case. No heavy all-caps headlines.

Official Google Fonts sources / SIL Open Font License

ROLE	SIZE / LINE	WEIGHT
DISPLAY	56 / 64	450
PAGE TITLE	40 / 48	450
CARD TITLE	24 / 32	500
BODY	15 / 24	400
LABEL / CODE	12 / 16	MONO 400

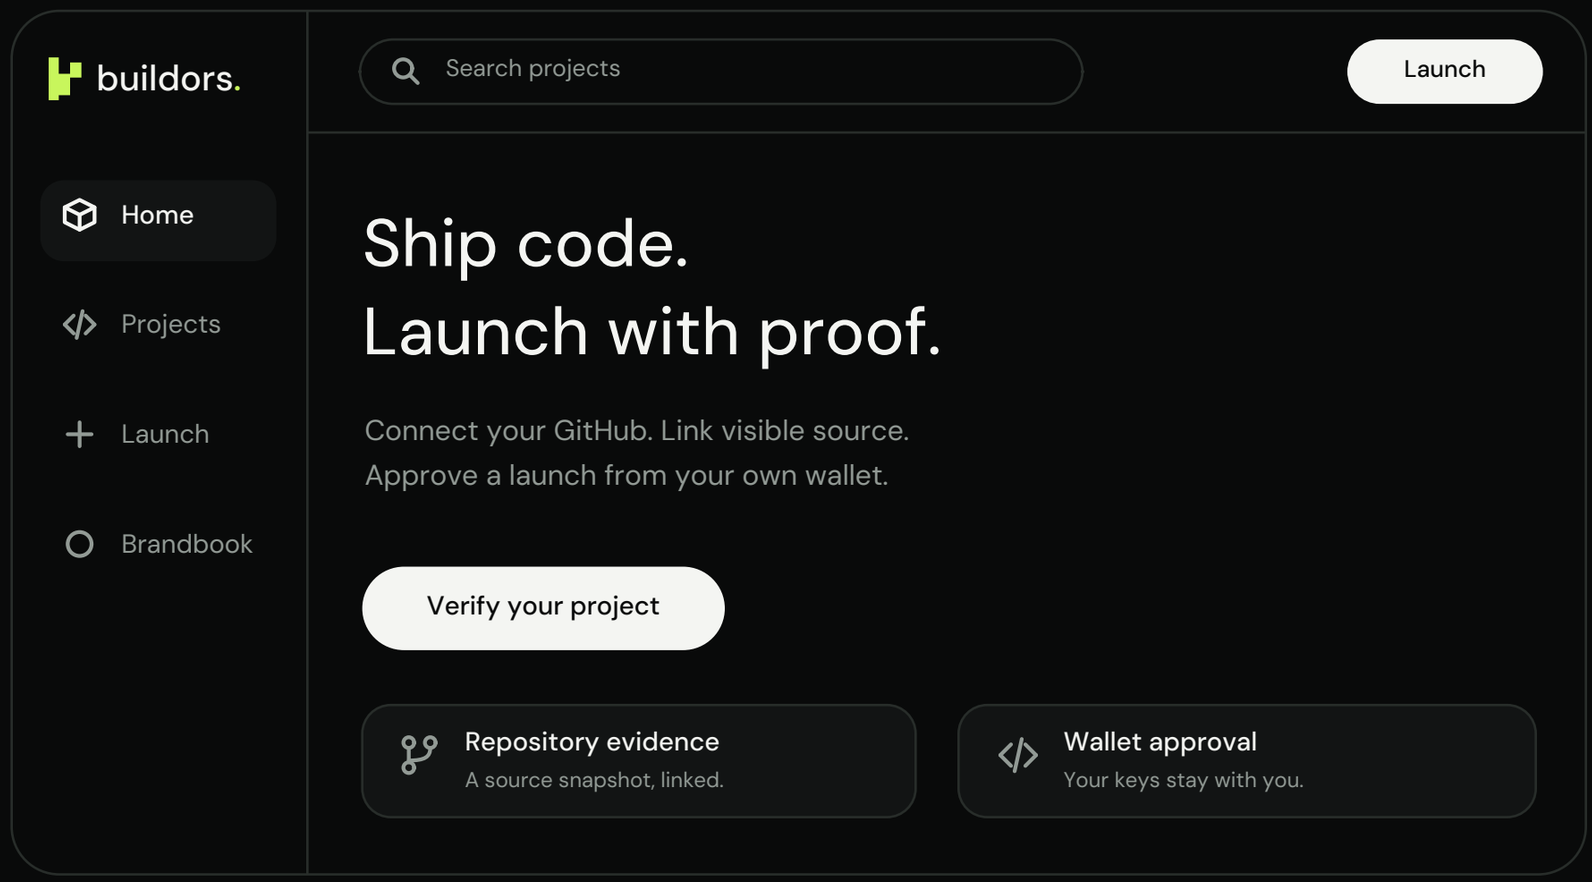
owner/repository

commit <sha> / source snapshot

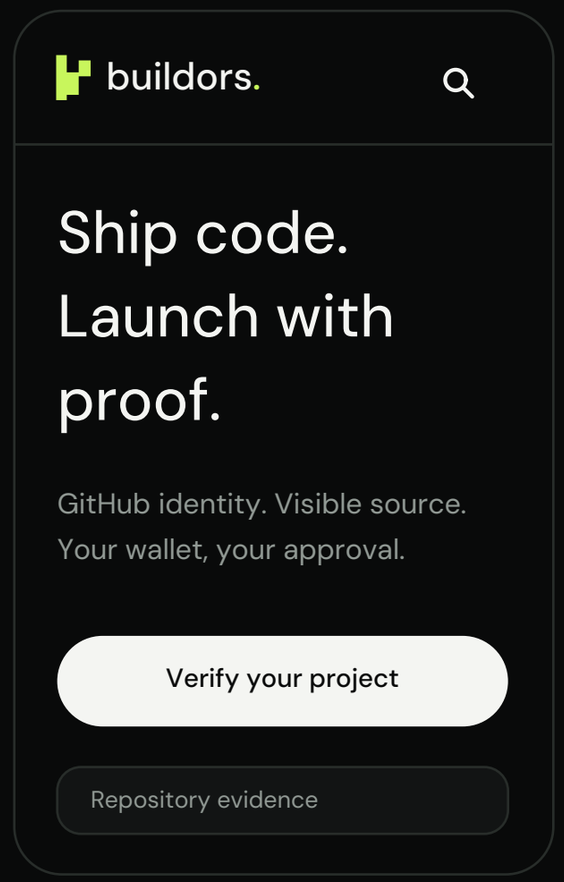
Give the work room to breathe.

A persistent desktop rail, a simple top bar, and one clear content column. On small screens, stack the same priorities.

DESKTOP SHELL / COMPONENT MOCKUP



MOBILE / SAME HIERARCHY



SPACE / 4 8 12 16 24 32 48 64

Card radius 20 / Button 48 x pill

Calm controls. Unambiguous states.

Buttons use shape, labels, and focus together. Color alone never carries the meaning.

DEFAULT	HOVER	KEYBOARD FOCUS	DISABLED

Connect wallet	Connect wallet	Connect wallet	Connect wallet

48 px height / 999 px radius / 16-24 px horizontal padding

WORKING + PENDING

Preparing...

CONFIRMING

Keep the exact signed transaction. A delayed receipt is not permission to start another launch.

FOCUS + FEEDBACK

https://github.com/owner/project

Name the state and the next action. Preserve entered details after recoverable errors.

Make discovery useful, even when empty.

Keep search quiet, results honest, and pagination predictable. Never fabricate activity to fill the interface.

Search repositories or tokens

Launch a project

PAGINATION / SPECIMEN

< 1 2 3 >

Keep the current page explicit and disable unavailable directions. With a single page, show 1 of 1 and disable previous and next.

NO MATCHES

No matching projects

Try another repository, token name, or symbol. Offer a visible clear-search action.

Clear search

Evidence first. Approval stays with you.

Connect GitHub, inspect source, prove wallet ownership, then approve the exact noncustodial creation transaction.

01 **Connect GitHub**

A real identity, with server-side OAuth.

02 **Verify the repository**

Check control, public source and a pinned commit.

03 **Prove wallet ownership**

Sign an expiring message, without sending funds.

04 **Review and sign**

Browser mint + wallet sign the prepared creation.

05 **Finalize and publish**

Show the listing only after the receipt is finalized.
